UK DISTRIBUTOR BRIGANTIA VALUES HORNETSECURITY'S SERVICES FOR THEIR HIGH-LEVEL CONTROL AND PROTECTION

"Brigantia chose to work with Hornetsecurity following the acquisition of The Email Laundry, which was a great, solid solution for end-to-end email security. After The Email Laundry was integrated into Hornetsecurity, Brigantia gained access to a much larger organisation, thanks to their comprehensive offerings in email security, productivity, data storage, restoration, and backup. Hornetsecurity's portfolio has undergone continuous development, with new features such as disaster recovery being added on a regular basis. Hornetsecurity's solutions are known for being user friendly, intuitive, effective, and first class at delivering high-level control, in addition to offering high-level protection for customers' IT infrastructures.

Hornetsecurity serves as an email security and compliance service, ensuring secure and protected email communication. This is supplemented by their email productivity services, which ensure that customers are always operating at full capacity. Because of Hornetsecurity's recent acquisition of Altaro, Hornetsecurity's offerings have now expanded into both Virtual Machine and Microsoft365 backup, ensuring that not only customers' emails, but also their resulting data, are secure and protected.

Brigantia has always worked closely with Hornetsecurity on their expansion journey, collaborating with local sales and marketing teams to realise the region's full potential."

Robert Hall, Product Marketing Director, Brigantia Partners Ltd
